## 4 in a Row

Materials: 20 counters (10 of one color and 10 of another color). You could use coins such as pennies and nickels, instead of colored counters.

## Directions:

1. Player 1 gets 10 counters of one color and player 2 gets 10 counters of another color.
2. Player 1 puts a counter on the 2 numbers you will add.
3. Player 1 puts a counter on the sum in the 4 in a Row grid.
4. Player 2 moves 1 of the counters to a different number, adds the numbers, and puts a counter on the sum.
5. Continue taking turns until someone gets 4 in a row.

| 4 in a Row |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 37 | 47 | 67 | 77 | 32 | 50 |
| 66 | 99 | 76 | 68 | 41 | 59 |
| 41 | 94 | 86 | 64 | 52 | 70 |
| 98 | 71 | 89 | 82 | 63 | 81 |
| 74 | 54 | 59 | 65 | 59 | 55 |

pick 2 numbers to add $\downarrow$

| 14 | 23 | 41 | 53 |
| :--- | :--- | :--- | :--- |

| 45 | 18 | 36 | 29 |
| :--- | :--- | :--- | :--- |
